Computer Science Student | Full-Stack Developer

PROFESSIONAL SUMMARY

Computer Science student and software developer with hands-on experience building full-stack web and mobile applications using **React, Flutter, Node.js, FastAPI, and Django**. Strong interest in integrating **AI-powered features** to enhance productivity and user experience. Completed a software development internship with real-world exposure to **API integration**. Passionate about building scalable, user-focused solutions that solve real problems.

TECHNICAL SKILLS

Frontend & Frameworks: Flutter, JavaScript, React, Next.js, HTML5, CSS3

Backend & Databases: Node.js (Express), FastAPI, Django, PostgreSQL, MongoDB

Tools & Platforms: Git, Android Studio, VS Code, Vercel, Postman

Concepts: RESTful APIs, Authentication, Agile Methodologies

PROJECTS

Personal Portfolio | React, CSS, Node.js

Live: my-portfolio-ruby-six-42.vercel.app

- Designed and developed a responsive personal portfolio using React, CSS and Node, improving project visibility and enabling recruiters to access live demos and source code in under one click.
- Implemented modular React components and clean UI layouts for optimal performance and accessibility.
- Deployed on Vercel with production-ready build optimization.

Happy Bot | Node.js, Next.js, Express, PostgreSQL

Live: happybot.vercel.app

- Built an AI-powered customer support chatbot using Node.js, Next.js, Express, and PostgreSQL, reducing repetitive customer inquiries and improving response availability to 24/7 support .
- Designed backend APIs for question handling, response delivery, and database storage.
- Focused on scalability, 24/7 availability, and improved customer engagement.

Nawiri EmpowerHub | React, FastAPI, PostgreSQL

Live: nawiriempowerhub.org

- Developed a full-stack web platform for a grassroots initiative focused on community empowerment across Kenya.
- Implemented backend services using FastAPI for content management, donations, and event handling.
- Implemented UI/UX improvements to enhance accessibility and storytelling impact.

Task Master | Flutter, Firebase, MongoDB (*In Progress*)

- Developing a smart productivity mobile application for task tracking, prioritization, and collaboration.
- Implemented Firebase Authentication and real-time data synchronization.

Daily Light Collaborative Full-Stack Web Application *Django REST, PostgreSQL, React (Vite)*

- Collaborated with a small team to design and develop a full-stack web platform from idea to implementation.
- Contributed to both backend and frontend development, including REST APIs, authentication, blog CRUD, and responsive UI components.
- Implemented features such as secure file uploads, AI-assisted content moderation, community interactions, secure file uploads, AI-assisted content moderation and community interactions..

INTERNSHIP EXPERIENCE

Software Developer Intern – Future Interns

Mar 2025 – Apr 2025 | Remote

- Contributed to the development of a live weather web application using React and Axios.
- Integrated RESTful APIs from a Node.js backend and resolved CORS-related issues.
- Collaborated in an agile team environment using Git for version control.

EDUCATION

Bachelor of Science in Computer Science

Egerton University, Njoro, Kenya

Expected Graduation: November 2027
